

## EDITORIAL

This is cause for celebration that we have successfully complete three volumes of Journal of Advanced Biotechnology and Bioengineering (JABB). Now, welcome to the fourth volume of JABB, the internationally renowned biotechnology and bioengineering journal from Synergy Publishers.

JABB is an international research journal, which has published top-level and original research articles from all areas related to biotechnology and bioengineering. Areas and subareas of interest include (but are not limited to) environmental biotechnology, food biotechnology, biosensors, plant-cell biotechnology, biochemical engineering, biochemistry, microbiology, protein chemistry, cytology, neurobiology, neurosciences, genetic engineering, microbial biotechnology, animal biotechnology, marine biotechnology, biocatalysis & biotransformation, metabolic, engineering and more. JABB provides a forum that will be essential reading for all the scientific communities working at the biotechnology and bioengineering. As the very name JABB shows, our journal is highly interdisciplinary, appealing to researchers spanning the breadth of experimental and theoretical biotechnology and bioengineering.

From launch, all issues of JABB were freely available to all readers via the website-<http://www.synergypublishers.com/journal-of-advanced-biotechnology-and-bioengineering>. Free online institutional access to all content is also available following a simple registration process. Publishing in JABB could therefore ensure that your work would benefit from great exposure across our many readership communities. All submissions to the journal will be handled by our exceptional team of Scientific Editors, who are extremely well qualified to manage the peer review process in a rigorous yet fair and efficient manner.

The fourth volume of JABB will also provide authors a new dedicated subject journal characterised by the quality, speed of publication and innovative technology. Manuscripts can be easily submitted using our simple online system.

In the fourth volume we demonstrate our commitment to publishing high-impact and multidisciplinary research of the high quality covering all aspects of the biotechnology and bioengineering. Our fourth volume is bursting with examples of important and high-impact research that will be found within these pages.

Finally, we are committed to developing and taking forward biotechnology and bioengineering so that the journal fully meets the aspirations of the broad research communities we serve. We specially hope you enjoy our journal. Do make sure you stay in touch with the latest exciting research published in JABB. Of course, we welcome your submissions of high-quality original research. Articles can be submitted via our website.

With our best wishes,

**Zhiwn Han**
