

EDITORIAL

Welcome to the inaugural issue of the **Journal of Advanced Biotechnology and Bioengineering** (JABB), the new biotechnology and bioengineering journal from Synergy Publishers.

JABB is an international research journal, which publishes top-level and original research articles from all areas related to biotechnology and bioengineering. Areas and subareas of interest include (but are not limited to) environmental biotechnology, food biotechnology, biosensors, plant-cell biotechnology, biochemical engineering, biochemistry, microbiology, protein chemistry, cytology, neurobiology, neurosciences, genetic engineering, microbial biotechnology, animal biotechnology, marine biotechnology, biocatalysis & biotransformation, metabolic engineering and more. JABB provides a forum that will be essential reading for all the scientific communities working at the biotechnology and bioengineering. As the very name JABB shows, our new journal will be highly interdisciplinary, appealing to researchers spanning the breadth of experimental and theoretical biotechnology and bioengineering.

From launch, the latest issue of JABB will be made freely available to all readers *via* the website-<http://www.synergypublishers.com/journal-of-advanced-biotechnology-and-bioengineering>. Free online institutional access to all content will be available following a simple registration process. Publishing in JABB will therefore ensure your work benefit from great exposure across our many readership communities. All submissions to the journal will be handled by our exceptional team of Scientific Editors, who are extremely well qualified to manage the peer review process in a rigorous yet fair and efficient manner.

The launch of JABB will provide authors a new dedicated subject journal characterised by the quality and innovative technology. Manuscripts can be easily submitted using our simple online system.

In our first issue we demonstrate our commitment to publishing high-impact and multidisciplinary research of the high quality covering all aspects of the biotechnology and bioengineering. Our inaugural issue is bursting with examples of important and high-impact research that will be found within these pages.

Finally, we are committed to developing and taking forward biotechnology and bioengineering so that the journal fully meets the aspirations of the broad research communities we serve. We specially hope you enjoy our first issue. Do make sure you stay in touch with the latest exciting research published in JABB. Of course, we welcome your submissions of high-quality original research. Articles can be submitted *via* our website.

With our best wishes,

Zhiwn Han
